ARCHITECTURE PROFILE

Operator-technologist who turns complex technical work into visible standards, governed workflows and adopted operating mechanisms. Direct experience spans agentic workflow patterns, RAG, human authority, evaluation, telemetry, high-reliability engineering and enterprise operations. Connects business consequence, technical constraints, evidence and sustainable ownership.

EXPERIENCE · CURRENT ROLES FIRST, THEN REVERSE CHRONOLOGY

Director of Operations 2025–Present
Vape-Jet

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows.
- Connects factory, field, customer and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

Founder / AI and Automation Advisor 2017–Present
DudeWorth

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.

Regional Director 2021–2023
Cardinal Building Products

- Built the company's first remote regional operation and modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Chief Pilot, Autonomous Systems and Aerial Data Operations 2018–2022
ZeusVu

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based aerial-inventory concepts and designed medical delivery and chain-of-custody concepts connecting technology, risk, stakeholders and governed execution.

ROLE ALIGNMENT

Architecture: reference patterns, integration boundaries, standards and decision records.

GenAIOps: RAG, agents, evaluation, observability, human-in-the-loop design and governance.

Operating model: intake, review cadence, escalation, ownership and learning loops.

Communication: translation across technical, operational, executive and customer stakeholders.

TECHNICAL TOOLKIT

Agentic AI	LLM workflows	RAG patterns
Human-in-the-loop	Python	SQL
JavaScript	TensorFlow	Tableau
Odoo/ERP	Jira	Confluence
HubSpot	Slack	GIS

ARCHITECTURE POSTURE

Define the use-case load. Select a reusable pattern. Bind security and human authority. Specify evaluation and operating evidence. Use exceptions and telemetry to evolve shared services. Transfer sustainable ownership.

VERIFIED SCALE

Approximately five million second-day orders annually in a 24/7 Amazon operation.

Approximately 1,000 fielded robots informing operating feedback loops.

100% safety record with no FAA incidents in regulated drone operations.

EXPERIENCE CONTINUED

Operations Management / Site Leader

2014–2018

Amazon

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience and team engagement; contributed to Prime Air research and Amazon Flex geolocation concepts.

Chairman of the Board

2014–2017

Enviro Social Capital

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

CMPT and EDS Pittsburgh Chapter Chair

2012–2016

IEEE

- Led regional technology programming connecting industry, academia, STEM outreach, electronics, manufacturing and emerging technology.

Director of Operations and Engineering Management

2000–2013

Compunetics

- Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures and process controls; collaborated with high-consequence customers and partners including DoD, CERN, Intel and AMD.

EDUCATION

University of Pittsburgh

Bachelor of Science

Academic grounding includes materials science, physical chemistry and biology-related studies.

CREDENTIALS

Google AI Essentials

IBM Enterprise Design Thinking Practitioner

Six Sigma Certification

OSHA 10

WHAT THE RECORD SUPPORTS

- Lead architecture conversations where standards must survive contact with operations.
- Convert recurring decisions into review mechanisms, scorecards, reusable patterns and decision records.
- Keep human authority, escalation, exception and rollback paths explicit in AI-enabled workflows.
- Use telemetry and recurring exceptions to improve shared services without erasing legitimate domain variation.
- Transfer capability through visible ownership, runbooks, training and operating cadence.

EVIDENCE BOUNDARY

Russell does not claim prior ownership of CGI's exact centralized GenAIOps platform. The relevant case is adjacent: complex technical systems, reusable operating patterns, governed execution and direct AI workflow design.

CANDIDATE VISION

The independent site demonstrates an Enterprise AI Building Code, an interactive Architecture Permit Review and a 90-day entry plan.
